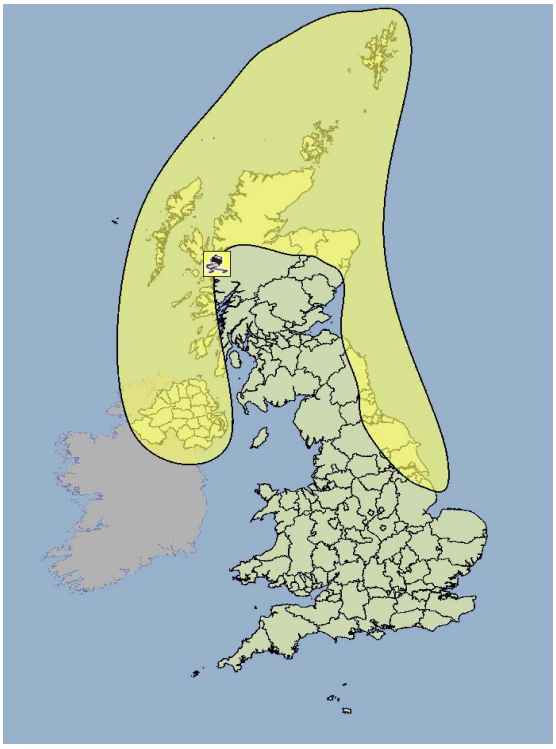
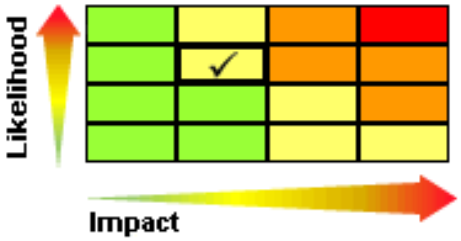
National Severe Weather Warning Service





Chief Forecasters Assessment
Showers of rain, sleet and snow are expected overnight, with snow most likely inland away from immediate coastal areas and over hills. The extent of ice will vary across the area with inland areas most prone whilst coastal areas exposed to the northerly winds are less likely to be affected. 1 or 2 cm of snow may accumulate above about 100 m with temporary deposits at lower levels, mainly late in the night.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **16:00 on Tue, 26th Dec 2017** until **11:00 on Wed, 27th Dec 2017**

Icy patches are expected tonight and into Wednesday morning.

Icy patches are expected to develop on untreated surfaces, pavements and cycle paths and where showers wash off treatment. Some injuries from slips and falls on icy surfaces may occur.
